

Master

```
graph TD; Master[Master] --- Bus; subgraph Computing_node [Computing node]; Worker1[Worker 1<br/>- Experiment controller]; Worker2[Worker 2<br/>- High priority app<br/>- Low priority app]; Worker3[Worker 3<br/>- High priority app replica]; end; Bus --- Worker1; Bus --- Worker2; Bus --- Worker3;
```

Worker 1

- Experiment controller

Worker 2

- High priority app
- Low priority app

Worker 3

- High priority app replica

Computing node
